Grants Online Overview

Overview

The National Oceanic and Atmospheric Administration (NOAA) offers a variety of competitive and non-competitive grants and Awards to various communities including States, Universities, and non-profit organizations. Prior to the advent of Grants Online, the processing of grants was a paper-based task involving time-consuming human interactions and program policies. The process of awarding grants to the most qualified applicant for a competitive Award, and to qualified designated applicants of non-competitive Awards, was also largely paper-driven.

As part of its strategy to move scientifically and operationally into the 21st century, Grants Online was developed. Grants Online is an E-Government initiative to create an automated tool that will support the grants management lifecycle activities. Grants Online significantly streamlines and unifies grants processing throughout all of NOAA, allowing the agency to increase efficiencies related to mission goals.

Grants Online is developed to answer several issues that occur during the Award processing including:

- Reduce or eliminate paper forms for application.
- Provide an interface with Grants.gov to ensure applicants can apply for grants electronically.
- Reduce the processing time by incorporating workflows between Federal Program Officers (FPO), Grants Management Division (GMD), Financial Assistance Legal Division (FALD), and Grantees.
- Serve the NOAA community in its efforts to meet its mission goals.

Grants Online allows Grantees to:

- Accept Awards electronically.
- Manage user roles for individuals within their organization.
- Submit post – Award action requests and Performance Progress Reports
- Correspond with your NOAA Program Officer and Grant Specialist.

Managing Recipient Users

The Manage Recipient Users link allows Recipient Authorized Representatives and System Administrators to view and edit user roles for your organization.
