U.S. Distributions of the 15 ESA-listed Indo-Pacific Coral Species

Threatened Corals	Occurrence in U.S. Pacific Areas <i>(this information may change as more reports become available)</i>			
	Guam	Commonwealth of the Northern Mariana Islands	Pacific Remote Island Areas	American Samoa
<i>Acropora globiceps</i>	Confirmed	Confirmed	Confirmed	Confirmed
<i>Acropora jacquelineae</i>	Possible	Possible	Possible	Confirmed
<i>Acropora lokani</i>	Possible	Possible	Possible	Possible
<i>Acropora pharaonis</i>	Unlikely	Unlikely	Unlikely	Unlikely
<i>Acropora retusa</i>	Confirmed	Possible	Confirmed	Confirmed
<i>Acropora rudis</i>	Unlikely	Unlikely	Unlikely	Unlikely
<i>Acropora speciosa</i>	Possible	Possible	Confirmed	Confirmed
<i>Acropora tenella</i>	Possible	Possible	Possible	Possible
<i>Anacropora spinosa</i>	Possible	Possible	Possible	Possible
<i>Euphyllia paradivisa</i>	Possible	Possible	Possible	Confirmed
<i>Isopora crateriformis</i>	Possible	Possible	Possible	Confirmed
<i>Montipora australiensis</i>	Possible	Possible	Possible	Possible
<i>Pavona diffluens</i> ¹	Unlikely	Unlikely	Unlikely	Unlikely
<i>Porites napopora</i>	Possible	Possible	Possible	Possible
<i>Seriopora aculeata</i>	Confirmed	Confirmed	Possible	Possible

¹Colonies resembling *P. diffluens* in the Pacific Ocean are considered to be a different, currently undescribed species.

Confirmed - we consider that this species occurs in this U.S. jurisdiction because of confirmed reports of this species from this U.S. jurisdiction.

Possible - this species has not yet been reported or confirmed within this U.S. jurisdiction; however, as survey effort increases it is possible this species may be observed within this U.S. jurisdiction in the future.

Unlikely - the known range of this species is limited to the Indian Ocean and Red Sea and there are no confirmed reports of this species occurring in this U.S. jurisdiction, thus we currently consider it a foreign species (entirely outside of U.S. jurisdiction).
